

**NAME**

`musixflx` – process `mx1` files (the second pass of 3-pass MusiXTeX typesetting)

**SYNOPSIS**

**musixflx** *jobname*[*.mx1* | *.tex*] [*debugmode* ]

where *debugmode* can be

d	for debug information to the screen
m	for line numbers to the screen
f	for debug information to a log file <i>jobname.mx1</i> (not <i>.mx1</i> )
s	to get the computed lines immediately on the screen

To allow for ease of use with a batch file, **musixflx** can be fed with either *jobname.mx1*, *jobname.tex*, or just *jobname*, any of which open *jobname.mx1*.

**SEE ALSO**

**musixtex**(1)  
`musixdoc.pdf`

**AUTHOR**

This manual page was written by Andreas Tille <tille@debian.org> for the Debian GNU/Linux system (but may be used by others). Corrections to the synopsis were pointed out by Peter Breitenlohner <peb@mppmu.mpg.de> and implemented by Bob Tennent <rdt@cs.queensu.ca>.
